Work Experience — Year

Business Intelligence Administrator – IT Operations, Central Arizona Supply — 2023-2026

- Administrated company instances of Progress OpenEdge, Microsoft SQL Server, PostgreSQL databases and Google BigQuery Data Warehouse.
- Led in the acquisition, administration, and management of company data warehouse (Google BigQuery).
- Aided in the development and administration of inhouse data stack including the replication and synchronization of data across various transactional data silos.
- Implemented and managed the BI software and reporting stack as well as aided in reporting and data analytics operations in collaboration with stakeholders and other analysts as needed.
- Responded to data production incidents and aided in fielding stakeholder requests and help desk trouble tickets as needed.

Data Analyst – Business Planning & Operations, ZipRecruiter — 2019-2023

- Performed queries on data stored in Data Warehouse/Data Lake for reporting and Analysis
- Modeled, created, and managed dashboards for reporting on Key Performance Indicators (KPIs), business trends, and analysis results to communicate to stakeholders
- Aided in building and maintaining intermediary tables used in ad hoc reporting and analysis
- Directly communicated and collaborated with stakeholders, including project managers, to manage reporting needs and ongoing analysis to support business insights.
- Worked with Data Science and Machine Learning teams in managing the random sampling and labeling of large datasets to inform predictive models.

Marketplace Compliance Specialist – Trust & Safety, ZipRecruiter — 2018-2019

- Monitored and reviewed accounts to ensure account compliance with service ToU as well as state, federal, and international laws.
- Utilized multiple private and public resources such as “emailage”, Secretary of State portals, UK Companies House, and Canada Federal Corporation Registry to perform investigatory reviews of accounts.

- Assisted in monitoring and maintaining company and partner compliance with Data Privacy and Protection laws (including, but not limited to, CCPA and GDPR)
- Collaborated with other teams in developing best methods and practices to maintain compliance with national and international Data Privacy laws and mitigate risk.
- Received, interpreted, and processed various types of data access requests including, but not limited to, Data Subject Access Requests (DSARs) and court-issued subpoenas in a timely manner with little to no margin for error.
